

Install new sound in Set Memory Roland FR-8x:

Install a new (different) sound in Orch. 1 (or Orch. 2) SET memory

Begin by turning on accordion and selecting Orch 1 button, then:

1. turn on register button (1-14) you want to change

2 briefly push Menu/Write button

3 turn data knob until you see Orch. 1 Edit in screen (menu page 5)

4 push data knob

5 push data knob again - see Tone highlight in yellow

6 turn data knob to the new Sound [tone] you want to install (play a few keys on the keyboard to be certain that is the sound you want to save.

7 push and HOLD Menu/write button until you see Write in screen.

8 You will see SYSTEM highlighted in yellow, turn data knob one click clockwise to see SET in screen

9 briefly push Menu/write button - see Set 100 highlighted in yellow

(set 100 is Dale Mathis Turn-On set) You will see a different number if you had changed to a different set before you began this process.

10 briefly push Menu/write button - see parameter values highlighted in yellow

11 briefly push Menu/write - see clock face in screen (the system is saving to memory)

12 turn off accordion, then turn accordion on and check to see if the sound you selected has been saved to Register you selected.
